a
Threshold set for 85% sensitivity on the sample
Closed form (any model, any population)
APTOS (simulated)
DDR (simulated)
DeepDRiD (simulated)
SUSTech (simulated)
Probability that sensitivity falls below 80% (%)
Referable cases in the labelled sample
b
At screening prevalence
5% referable
10% referable
20% referable
43% referable (external sets as sampled)
Probability that sensitivity falls below 80% (%)
Consecutive images labelled
